

Adding Hyperlinks to a Post (or Page)

Blogs posts often include hyperlinks, which take your readers to other blogs or websites. To create a link from your blog to the *Edublogger's Quick Tour Guide* website, for instance, start by selecting the word or phrase you wish to turn into a link.

From the formatting bar, click on the chain link icon.

Type or – better yet – paste in the URL. Click on *Insert*. Whatever you selected is now underlined.

I recommend opening the *Target* dropdown and selecting the *Open in new window* option so that your readers are not directed away from your blog.

If you type in a *Title*, it will appear as a pop-up when readers mouse over the link.

To test your links, click on *Visit Site*.
